

Dear Incoming Third Grader,

Congratulations on successfully completing 2nd grade! We know that you are very excited that summer is here! Next school year, you will be a 3rd grader here at CSCA and we cannot wait to be your teachers! We have put together a packet to help you keep up with all of the skills that you have learned this past year. Take some times each day to read a book, and work on a math page.

The Reading Packet has two mandatory books for you to read. There is an assignment for each of those books that you will complete after you have read the entire novel. There are also four journal pages you will find. Two of the journals are for your mandatory books that you will read, and the other two are for your optional books. On these journal sheets we would like you to give a short summary of the books you read.

The Math Packet will help you keep up with the math facts you have worked so diligently on throughout 2nd grade. Instant recall of basic addition, subtraction, and multiplication skills is our goal. The more you practice these facts over summer, the better prepared you will be for 3rd grade. There are many fun websites, apps, and games you can play to help practice your math facts also. You can check out websites such as factmonster.com, aplusmath.com, and MobyMax.com to help practice your facts online.

We pray that you enjoy a safe, fun-filled summer with family and friends. We are looking forward to getting to know you in the fall!

In Christ's Name,

Your 3rd Grade Teachers

Third Grade Summer Reading Packet

2016

Coral Springs Christian Academy

2016-2017 Third Grade Summer Reading List

Dear Parents,

Reading throughout the summer is something that all students should continue to practice and enjoy. The two required reading books are:

Officer Spence Makes No Sense

Tales of a 4th Grade Nothing

Students must also read two books of their choice from the following series:

Box Car Children

My Weird School

A-Z Mysteries

Magic Tree House

Have a wonderful and relaxing summer discovering new places and characters through the magic of books!

Step-by-Step Model Drawing

1. Read the entire problem.

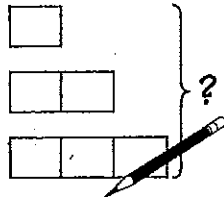

2. Rewrite the question in sentence form, leaving a space for the answer.

3. Determine **who and/or **what**** is involved in the problem.

4. Draw the unit bar(s).

5. Chunk the problem, **adjust** the unit bars, and fill in the **question mark**.

6. Correctly **compute** and solve the problem.

7. Write the answer in the sentence, and make sure the answer makes **sense**.
